PROFESSIONAL SUMMARY

VIT Computer Science and Engineering undergraduate (CGPA: 8.2) with 2 internships in dashboard development and data analytics. Builds full-stack and AI-enabled applications using Java, Python, React.js, Node.js, SQL, AWS, OCI and Power BI. Experienced in data preparation, KPI reporting, REST APIs, computer vision and NLP; holds 3 Oracle credentials in Generative AI, AI Foundations and Java.

TECHNICAL SKILLS

- Java, Python, C/C++
- HTML5, CSS3, REST APIs
- Power BI, Data Analysis
- DSA, OOP, DBMS
- JavaScript, SQL
- MySQL, Oracle DB, SQLite
- Git, GitHub, VS Code
- Operating Systems
- React.js, Node.js, Express.js
- AWS, Oracle Cloud (OCI)
- Jupyter Notebook, Figma
- Networks, OpenCV, NLP

PROFESSIONAL EXPERIENCE

Dashboard Development Intern — IIT Ropar *May–Jun 2026*

- Built institutional dashboards from multi-source data; refined data loading, navigation and dashboard usability.

Data Analytics Intern — Perfect Techno Consultants Pvt. Ltd. *May–Jun 2026*

- Applied a 3-stage analytics workflow (cleaning, preprocessing, EDA) and built Power BI reports for operational KPI tracking.

PROJECTS

ResumeIQ: AI Resume Screening and ATS Analysis Platform *Python, Flask, SQLite, JWT*

- Built a Flask ATS analyser for 3 resume formats (PDF, DOCX, TXT), with JWT authentication, skill extraction and a 4-part score covering skills, sections, formatting and impact; includes keyword matching and downloadable reports.

PinSpace: Responsive Visual Discovery and Image Editor *React, JavaScript, APIs*

- Contributed React UI for a responsive 1–5-column discovery grid with search, pagination and lazy loading; project includes 15+ filters, background removal and 2× upscaling.

VisionTrack: Computer Vision Traffic Surveillance System *Python, OpenCV, React, APIs*

- Developed upload/results views for 2 media types, presenting 5 CV functions: vehicle detection, plate localization and edge extraction, vehicle classification and violation detection; contributed to 3-layer frontend, API and CV integration.

CareSync: Role-Based Hospital Operations Management System *HTML/CSS, Node.js*

- Built a browser-based hospital system with 5 user roles across patient/doctor records, appointments, admissions, pharmacy and lab workflows; added billing, printable invoices, calendar, CSV export and an AI-triage demo backed by localStorage.

EDUCATION

Vellore Institute of Technology, Vellore *Aug 2023 – Jul 2027*

B.Tech in Computer Science and Engineering **CGPA: 8.2**

Rajkiyakrit High School, Aurangabad, Bihar — Class XII (CBSE) *2021 – 2022*

Science with PCMB **Percentage: 80%**

CERTIFICATIONS AND ACHIEVEMENTS

- **Oracle Cloud Infrastructure 2025 Generative AI Professional** – Oracle professional-level credential in Generative AI on OCI.
- **Oracle Cloud Infrastructure AI Foundations Associate** – Oracle credential covering foundational AI and machine-learning concepts.
- **Oracle Java Foundation Associate** – Oracle credential validating Java programming and object-oriented programming fundamentals.
- **VITEEE – All India Rank 27:** Achieved AIR 27 in the VIT Engineering Entrance Examination.
